**By A. M. Peters, M. J. Myers : Physiological Measurements with Radionuclides in Clinical Practice** more than 500 important terms and definitions in the field of good manufacturing practices in the gmp glossary from maas and peither gmp publishing mr imaging has become a powerful clinical tool for evaluation of brain anatomy its application has recently expanded into evaluation of brain function via assessment Physiological Measurements with Radionuclides in Clinical Practice:

As functional imaging continues to inform everyday clinical practice clinicians need to know more about the quantitative aspects of physiology and pathophysiology Presented in accessible language this book integrates the

principles and mathematics of measurement with physiological systems to which the quantitative problems are applied  
The book discusses the related basic mathematics the measurement of blood flow peripheral circulation and  
microvascular solute tran About the Author A Michael Peters is at Imperial College School of Medicine London  
Melvyn J Myers is at Hammersmith Hospitals NHS Trust London
