**By Loring B. Rowell : Human Circulation: Regulation During Physical Stress** journal of the american heart association blood pressure bp is the pressure of circulating blood on the walls of blood vessels when used without further specification quot;blood pressurequot; usually refers to Human Circulation: Regulation During Physical Stress:

Focusing primarily on the distribution of blood flow and its regulation in humans this well illustrated study illuminates the overall control of the human cardiovascular system Combined for the first time in a single volume are discussions of how peripheral vascular beds are controlled in humans how these control mechanisms interact with those of cardiac performance and the central circulation and how this vasomotor regulation serves the whole organism especially u Uniformly well written in a direct and informative style I highly recommend this book to practicing physicians and to medical students It can also serve as a reference for graduate students and instructors Journal of the American Medical Association
