4 of 4 review helpful Four Stars By Danny I like these cards a lot Good info and pictures Used them for usmle step 1 and I think they were helpful Most of the cards give a clinical scenario with a histological gross or radiographic image that I found nice because review books sometimes lack quality images for everything Surprisingly these did not take that long to go through granted I skipped some sections but usually Taken from the Robbins text and Klatt rsquo s own extensive collection these brilliantly illustrated flash cards present gross photomicrographic and radiologic images that allow you to test yourself on key pathologic information facts and functions Each card features two clinical vignettes 700 cases in all with images or diagrams two to five questions and an explanation to the questions on the opposite side About the Author Richard N Mitchell MD PhD Lawrence J Henderson Professor of Pathology and Health Sciences and Technology Department of Pathology Harvard Medical School Staff Pathologist Brigham and Women s Hospital Boston Massachusetts
