2 of 2 review helpful An excellent buy By Dr Felix Pearce This is in my opinion THE BOOK for a pathologist

dealing with dermatopathology The writing is clear and crisp and I appreciate the morphologically oriented classifications instead of the more common admixture of etiologic morphologic and topographic attempts of classification many of the categories meaning little to the morphologist 0 of 0 review h Thoroughly revised and updated this comprehensive authoritative reference will help both the experienced and novice practitioner diagnose skin diseases and disorders more accurately and effectively A superb full colour art program illustrating both neoplastic and non neoplastic conditions will help the clinician easily interpret key clinical and diagnostic points About the Author David Weedon MD FRCPA Royal Brisbane Hospital Brisbane Australia
