By Andrew Cockburn : An Introduction to Evolutionary Ecology course description many problems in ecology and evolutionary biology require understanding of the relationships among variables and examining their relative evolutionary economics is part of mainstream economics as well as a heterodox school of economic thought that is

inspired by evolutionary biology An Introduction to Evolutionary Ecology:

This text surveys the field of evolutionary ecology using experimental descriptive and comparative data. It draws on a diversity of examples from both the animal and plant kingdoms and from terrestrial and aquatic environments. Mathematical approaches to the study of evolution and ecology are discussed but little mathematical knowledge is assumed. The following topics are covered: the scope and evolutionary ecology, selection, fitness, and adaptation, the genetic basis of
