**By Robert A. Weinberg : The Biology of Cancer** after successfully completing this module you will be able to describe the distinguishing features of a cancer discuss the mechanism by which cancers evolve cell biology of cancer the cell is the fundamental unit of life it is the smallest structure of the body capable of performing all of the processes that define life The Biology of Cancer:

9 of 9 review helpful a work of literature By L Policastro Definitely the right textbook for a comprehensive introduction to cancer Like a giant review article but with more breathing room to go into historical experiments and explain how we have arrived at the current understanding of cancer And lots of excellent illustrations and micrographs

You are getting more than a typical textbook it is more like a work of lit The Biology of Cancer is a textbook for undergraduate and graduate biology students as well as medical students studying the molecular and cellular bases of cancer The book presents the principles of cancer biology in an organized cogent and in depth manner The clarity of writing and the lucid full color art program make the book accessible and engaging The information unfolds through the presentation of key experiments which give readers a sense of disc This is an impressively thoughtful beautifully balanced analysis of where we stand today in the critical attempt to understand and thereby defeat cancer as a scourge on humanity Not only is it the perfect text for a serious course on cancer biology it sho
