Reviewing research on the molecular basis of oxygen homeostasis this text describes the changes in intracellular signalling and gene expression that lead to physiological responses to hypoxia in unicellular invertebrate and mammalian species It examines O₂ sensing systems in bacteria and archaea and demonstrates interrelationships among cell proliferation energy metabolism oxygen homeostasis redox states signal transduction and gene expression in humans and ot About the Author Dr Chandan K Sen is a tenured Professor of Surgery Executive Director of The Ohio State University Comprehensive Wound Center and Director of the Ohio State University s Center for Regenerative Medicine Cell Based Therapies He is also the A
