From CRC Press : Oral Lipid-Based Formulations: Enhancing the Bioavailability of Poorly Water-Soluble Drugs (Drugs and the Pharmaceutical Sciences) pharmaceutical particle technologies an approach to improve drug solubility dissolution and bioavailability international journal of pharmaceutical sciences review and research Oral Lipid-Based Formulations: Enhancing the Bioavailability of Poorly Water-Soluble Drugs (Drugs and the Pharmaceutical Sciences):

Oral lipid based formulations are attracting considerable attention due to their capacity to facilitate gastrointestinal absorption and reduce or eliminate the effect of food on the absorption of poorly water soluble lipophilic drugs Despite the obvious and demonstrated utility of these formulations for addressing a persistent and growing problem of major significance the pharmaceutical industry has been slow to apply and further develop this technology This title
